GPS Web Tracking & Fleet Management

What is VisiRun™?

VisiRun™ is a GPS Tracking and Fleet Management system that allows you to :

- ∴ Display all your vehicles' locations on the map, in real time
- ∴ Track and Trace the nearest vehicle to the next client address
- ∴ Send real-time messages to drivers and operators for the next missions
- ∴ Control route, distance (KM), drive times, stop times
- ∴ Receive alarms for unplanned stops, movements, speed limits
- ∴ Control if a vehicle enters or leave a specific area
- ∴ Keep in touch with drivers and operators on the field in real time

Advantages

Best Price on the Market — only **29 € / Month** per vehicle, all included. SIM

No hidden or additional costs — 0 installation costs, 0 hardware costs, 0 communication costs.

No SIM required — We provide the GPS Tracker with our own SIM and GPRS Traffic is included.

No software to install — No need to install any software. it can be used on any computer's browser.

Easy installation — you will receive the GPS tracker already configured and ready for use. Simply connect the GPS tracking box to the vehicle power supply in few minutes.

No minimum duration or hidden clauses — You can interrupt the service subscription at any moment, without penalties or additional charges. Simply return the leased GPS tracker to us in order to interrupt immediately the service subscription.

VisiRun™ Functions

POSITION: GPS Tracking in real time

- Track and trace on a map the real-time location of your fleet, drivers and field operators.
- Find any vehicle on the map by license plate, driver name, telephone number etc.
- Find the nearest vehicles to a given address, and assign the next mission to the right vehicle
- Zoom-in on the map, with a precision of up to 3 meters
- Easy one-click access to most functions, such as sending messages to drivers or looking at the vehicle's route on the map

ROUTE: Display vehicle's route

- Follow the actual vehicle's route in real time with the GPS tracker
- Search and display vehicle tracks, routes and activities of the last 12 months
- Display on the map any stops, restarts and instant speed measurement
- Control speed limits, driving time and distance for any route segment
- Verify departing and arrival time, duration of each stop along the route
- Monitor driving times, stop times, rest times

ALARMS and ALERTS: CONTROL ARRIVAL, STOPS, THEFT in real time

- Display and receive alerts via SMS/e-mail for each unexpected stop along the way
- Receive immediate notification if the vehicle moves unexpectedly during the night, the week-end etc.
- Receive notifications when a vehicle arrives or leaves a geographic area of interest (headquarters, warehouse, work sites, clients' sites, delivery sites, etc.) with advanced GEOFENCING.

COMMUNICATION: KEEP IN TOUCH WITH DRIVERS at any time

- Real-time communication with drivers and technicians at reduced costs
- Send text messages from the office to the driver's mobile phone with one click
- Receive and collect all replies sent from the driver's mobile phone to the office
- Search the message archive by date and vehicles

P.O.I.— Point of Interests

- Display Points of Interest (POI) on the map alongside vehicles such as customers' addresses, headquarters, branches, warehouses, plants.
- Verify if drivers or technicians actually stop at any of your points of interest along the way

REPORTS: Easy to read and effective reports. Export to EXCEL

- Detailed reports on distance covered each day for all vehicles.
- Reports on driving time, activity time, stop time for each driver, by period
- Reports on stops at POI – point of interest, by vehicle/person or by POI
